# Coverstar – the strongest name in swimming pool safety covers!

A Coverstar mesh or solid safety cover is the strongest way to prevent children and pets from getting into your pool when you can't be there. Custom-built to fit your pool perfectly and manufactured from best-in-class materials, a Coverstar cover is the best protection available for your family and your pool investment!

## We make it strong...to keep your family safe!

The stronger the cover, the safer the cover. Coverstar applies exclusive, patented design and manufacturing innovations to give our mesh and solid safety covers unmatched strength and durability.

## We make it easy...to install and maintain.

Unique features such as our exclusive center web and extra-long installation tool make it fast and easy to install and remove your Coverstar cover. All Coverstar covers keep debris out of your pool, and block virtually all sunlight – so you save on chemicals and enjoy cleaner water at opening time.

**A Coverstar Safety Cover eliminates this ugly, dangerous mess from your backyard!**  
*(Did you really want to drain and clean that?)*

**Auto and SAM –  
the Coverstar team!**

**Protecting your family  
with the best-built Solid,  
Mesh, and Automatic  
Safety Covers!**

**Ovals, kidneys, even pools with custom shapes, raised walls, stairs, rails or water features – we'll create a Coverstar cover that will cover any pool beautifully...and safely!**

# So many reasons why a Coverstar cover is your safest choice.

## Interlocking Seams for Extra Strength!

A safety cover is only as strong as its seams, potentially its weakest point. **Only Coverstar uses interlocked and double overlapped seams** to dramatically improve weight transfer from the cover material to the seams and webbing! There's simply nothing stronger!

All Coverstar mesh and solid safety covers exceed ASTM standards when properly installed.

## UV Resistant Thread

Our extra-durable thread resists sun damage and pool chemicals.

## Double Reinforcement

To provide additional strength for high-stress areas, we use bar and box tack reinforcement on all perimeter straps – **a Coverstar exclusive!**

## Custom Heavy-Duty Hardware

All 9000MX, 7000MS and 1000V series covers come with our low profile, heavy duty double springs. D-rings ensure your cover lies flat and fits tight for optimum safety while corrosion resistant brass anchors provide the ultimate combination of strength and durability.

## Double Decker Edge

The perimeter of most covers can fray and unravel. Our cover material is first hemmed, then sandwiched between double layers of webbing around the perimeter, so the edge can't unravel!

## Less Wear and Tear

Heavy duty vinyl nosing pads protect the cover against wear from coping and steps.

## Webbing Won't Abrade

Chafing strip sewn to **bottom** of cover protects the cover webbing from coping abrasion wear – and won't mark the coping, like other strips!

So many NEW reasons why to buy a Coverstar cover.

### Coverstar Exclusives

#### Sterling Silver Flush Wall Anchor

The SS flush wall anchor is pushed in and tightened after the cover is removed. This provides a clean look as the anchor head remains flush with the raised wall.

#### Snap-On Perimeter Padding

The Snap-On Perimeter Padding can be installed in specific locations to protect the cover from chaffing damage. The padding easily snaps onto the webbing and can be cut to size as needed.

## The right cover to fit your needs... and perfectly fit your pool!

Coverstar offers mesh covers for maximum drainage and solid covers that block 100% of sunlight – in a variety of material weights and colors. All can be custom designed to fit any size or shape pool precisely, including any special features such as raised walls, diving boards, stairs and rails.

### Mesh Safety Covers

#### 9000MX™ Max Shade Mesh\*
